getting this error when trying to edit a .xproj file "Unable to initialize DAO/Jet db engine". It is generated when I try to update the project to .NET 4.5. I updated all references to .NET 4.5 in Visual Studio. I even switched to "Source Code Control" and "Release Control" for the project, but that didn't solve the problem. I also looked at all sources and still couldn't find any cause of the problem. Does anyone have any ideas or advice as to what might be causing this? This happens in VS 2015 and .NET 4.5 so I don't have any dependencies other than .NET 4.5. Any help would be appreciated
