In fact, there were more than a dozen and they came in a variety of form factors, sizes, and technologies. Compaq even went ahead and released a Pro model that was more like a netbook. However, while the previous versions of the computer might not have been the best in terms of design or durability, the Pro model looked very nice. It also featured decent specs, something that most netbooks of the time lacked. In fact, the Pro model actually had a more powerful CPU, more RAM, and an SD card slot. The computer was sold for only a few years, during which time it was one of the most successful netbooks on the market. However, once HP purchased Compaq, the company halted production of the device. Since then
