Filters At the top of the window, along with the file's name and current layer, you see the menu bar that includes an "Effects" option and offers the following filters: * **Elements:** Elements uses `_hue_` and `_saturation_` (HSL) controls to enhance the contrast of an image and blend colors. You can find these controls on the Picture menu. * **Lighting:** The Lighting filter enables you to adjust the brightness, contrast, and color balance of the image. * **Mesh:** The Mesh filter creates an artistic look to an image by creating a 3-D, or "woven," grid. You can customize the style of the grid, as well as the placement and density of the lines, which have an artistic effect. * **Sharpen:** The Sharpen filter helps you remove blur from an image and has multiple settings for more aggressive or less aggressive blurring of an image. * **Watch:** The Watch feature records a series of keyboard strokes and then displays the commands and options available. These include tools such as the Pencil tool, which enables you to create a shape, and the Rectangular Marqu

Q: how to calculate frequency of characters of a file I'm trying to find the frequency of characters in a file using their Unicode representation. However, I have not yet done a successful task, only one that I have done before this was to find the length of Unicode character types like ç, ð, ř, etc. This is the code I have used and it seems to work well: #include #include #include #include using namespace std; int main() { string n; int i=0; ifstream fin; fin.open("att.txt"); while(fin>>n) { int len = n.length(); //cout<>c; ifs.get(); c[i] = 0; } ifs.close(); string m; for (const char* p = c; *p

What's New In?

Attorney General Jeff Sessions appears before the Senate Judiciary Committee on Capitol Hill on January 10, 2017 in Washington, DC. Attorney General Jeff Sessions is expected to announce his decision on whether or not to recuse himself from an investigation into possible ties between Russia and the Trump campaign on Monday, reports the Associated Press. His decision is the first big test for Sessions, who has been under fierce pressure since the New York Times reported last week that he failed to disclose communications with Russian officials, although he has said he did not have improper contacts with the Russian government during the presidential campaign. Sessions' announcement is expected around noon ET, the AP says. Sessions has already recused himself from a federal investigation into the Trump campaign's ties to Russia, which he said was unrelated to his work on the Trump campaign. But the attorney general has been defending his January confirmation hearing, in which he did not disclose his work as a senator for the Trump campaign, by saying his work was not directly tied to the campaign. Before entering the Trump campaign, Sessions had led the Senate's Sessions Committee's Russia investigation, the AP says. "There was no communication, there was no encounters with Russians," Sessions told reporters last week. His critics say his investigation in the Senate was meant to silence critics of the president, the AP reports. The Times reported that the attorney general's campaign continued at least through the Republican convention, and perhaps into the Democratic National Convention. During his confirmation hearing, Sessions faced multiple questions about those emails and his contacts with Russia's ambassador to the United States, Sergey Kislyak, while he was a senator, though the FBI has not confirmed that those contacts were improper. The Times reported that the FBI also confirmed last week that it was investigating whether Sessions misled Congress during his confirmation hearing. Sessions told the Senate Judiciary Committee that he did not meet with Kislyak at the Republican National Convention in Cleveland last year, despite evidence to the contrary, the Times reported.

Q: Django REST Framework: Generic detail view for nested attribute I have a simple nested REST API to a PostgreSQL database. I can GET/POST/PATCH/PUT a single entity just fine. However, I can't seem to make a generic detail view for it. models.py class Post(models.Model): user = models.ForeignKey(User, on_delete=models.CASCADE
